EDUCATION

University of Illinois at Urbana-Champaign Master of Science - Information Management (GPA: 4/4)	Illinois, USA Aug 2023 – May 2025
University of Pune Bachelor of Technology - Information Technology (GPA: 9.2/10)	Pune, India Aug 2017 – May 2021

TECHNICAL SKILLS

Languages: Python, SQL, R, JavaScript, HTML, CSS, C++
Database: MySQL, PostgreSQL, MongoDB, Firebase
Functional: Agile, Iterative, Waterfall, Scrum
Deep Learning: Tensorflow, PyTorch, Keras, Scikit-Learn
Transformation & Visualization: Alteryx, PowerBI, Tableau, Microsoft Excel, Matplotlib, Seaborn, plot, Sprinklr
Certifications: SAFe Certified Scrum Master, German Language (A1), Lean, Six Sigma, SQL for Data Analytics, Machine Learning: Hands-on Python in Data Science, Software Engineering Virtual Experience (JP Morgan Chase and Co.), Google Analytics for Beginners

PROFESSIONAL EXPERIENCE

Synchrony Financial Data Analyst Illinois, United States of America	May 2024 – Aug 2025
--	---------------------

Data Governance & Compliance Analytics

- Designed performance analytics solutions in **Tableau, Python, and Excel** to analyze 4,000+ system records, **reducing SLA breaches** by 25% and enabling leadership to identify critical operational bottlenecks through trend analysis.
- Automated cloud **data governance** and compliance reporting across 1,000+ **AWS** CloudFormation StackSets, achieving 99.5% adherence to ITGC standards while integrating monitoring dashboards for real-time visibility, reducing manual efforts by 60%.
- Migrated legacy Excel workflows into real-time KPI dashboards** with live data integration, saving 40+ hours per cycle and ensuring accurate visibility into compliance and risk metrics.
- Documented system requirements, workflows, and release notes in **Confluence**, ensuring accurate knowledge transfer and technical clarity across teams.
- Tracked and prioritized features, epics, and incident resolution tasks in **Jira**, improving cross-team collaboration and reducing turnaround time for high-priority issues.

Enterprise Data Analytics & Reporting Project

- Implemented real-time **Tableau dashboards** by building a Python–ServiceNow API integration, eliminating manual refreshes and improving reporting accuracy by 100%.
- Documented requirements and **technical workflows in Confluence**, tracked tasks in Jira, and **published reporting artifacts in SharePoint** to enable cross-functional collaboration and governance.

EJP, UIUC Senior Data Analyst Illinois, United States of America	Jan 2024 - May 2024
---	---------------------

- Developed and implemented a real-time monitoring dashboard in **Tableau to track KPIs** and service visit trends, enabling proactive decision-making by identifying key patterns in complex datasets and improving operational responsiveness.
- Generated comprehensive descriptive and inferential statistical reports using **Python and Excel** to summarize findings, support business strategy, and communicate actionable insights to stakeholders.

Accenture Solutions Data Analyst Maharashtra, India	Jul 2021 - Jul 2023
--	---------------------

- Designed and implemented an **event-driven reporting** pipeline using GCP (Pub/Sub, Cloud Functions, BigQuery) to automate Excel reporting, reducing reporting latency from hours to minutes and enhancing client experience for 300+ users.
- Built interactive **Tableau and Power BI dashboards** by integrating SQL queries and Python APIs to monitor workforce utilization, staffing patterns, and KPIs, enabling data-driven resource allocation that increased efficiency by 15%.
- Engineered scalable **ETL workflows on GCP** (BigQuery, Firestore, Spanner) to unify multi-source data, achieving 99%+ accuracy for financial reconciliation and compliance reporting across 200+ clients.
- Collaborated with Product Managers, Solution Architects, and Operations SMEs, capturing **requirements in Confluence** and **tracking deliverables in Jira**, ensuring analytics aligned with business KPIs such as compliance rate, turnaround time, and capacity.
- Optimized SQL queries and Python automation scripts for datasets (1M+ records), improving query speed by 40% and reducing cloud compute costs through advanced partitioning and clustering strategies.
- Mentored new analysts on Python scripting, **dashboard design**, and data pipeline best practices, strengthening team capability and reducing escalations by 25%.
- Supported operational activities, including incident resolution and service requests for a Fortune 500 client, ensuring strict compliance with **data governance and security protocols** while maintaining high service reliability.

DG FutureTech Product Analyst Maharashtra, India	Jan 2020 - Jun 2021
---	---------------------

- Developed a **sophisticated statistical model** using Python to predict user engagement, informing key product strategy decisions.
- Implemented **key performance indicators (KPIs)** in SQL to track user adoption of new features and created **visualized dashboards** with Microsoft Excel for product managers, driving a 20% increase in user adoption and 15% boost in consumption.
- Collaborated with sales and product teams to determine optimal pricing for a new product offering. Analyzed usage data and customer feedback **leveraging Python and SQL**, providing data-driven insights
- Built a scalable **Python data pipeline** processing information from 1,000+ customers, enabling real-time product performance insights for the CMO that **improved product performance and faster decision-making**.
- Created a **quantitative model in Python** to evaluate product performance. Designed and **executed A/B tests** to evaluate the impact of product and marketing changes, ensuring statistically rigorous experiments.
